

## **Thomas Jefferson Data Summary Cruise 6/26/2010**

Review Date 6/27/10

### **Summary:**

This sampling report presents data collected from the Thomas Jefferson for the period of 6/26/2010. CTD graphs for stations sampled during operational period were included with the data provided for this review. No map was available at the time of this review.

One (1) station was occupied during this reporting period: TJ72.

TJ72 was sampled for: TPH, VOAs, CTD fluorometry and dissolved oxygen. No samples were collected for bioassay using the Rototox test. Samples were collected from approximately 3.3 meters to approximately 1522 meters below water surface.

### **CTD Fluorometry & Dissolved Oxygen (data collected from 6/26):**

Station TJ72 showed no significant data.

### **LISST (data collected from 6/26):**

No LISST data was provided for this reporting period.

### **Toxicity Testing (Rototox Assay) (data collected from 6/26)**

No samples were collected for Rototox Assay.

### **Chemical Analyses (TPH and VOCs) (data collected from 6/26)**

Twenty-six (26) samples were collected for VOC analysis, including duplicates, and thirteen (13) samples were collected for TPH analysis. No data were provided for review at this time due to laboratory lag time.
